INTRODUCTION: This month sees the launch of our updated website (www.ivisionuk.com) which I hope meets with your approval . The site will have additions over the next few months which will include helpful design guide tips, more case studies for comparison and customer testimonials. Please also consider using our energy audit service which will give you a quick guide to a projects viability in terms of cost and carbon analysis. Also available from this month is our new product catalogue together with focused marketing for Car Park, Warehouse and cold-store lighting

Reductions in fixed overhead achieved recently

G24 INNOVATIONS LTD

G24 Innovations Limited are a UK company based in Cardiff. The company manufactures and designs solar modules and high value products using thin film technology. These products are ideal for integration with a wide range of products including mobile electronic devices

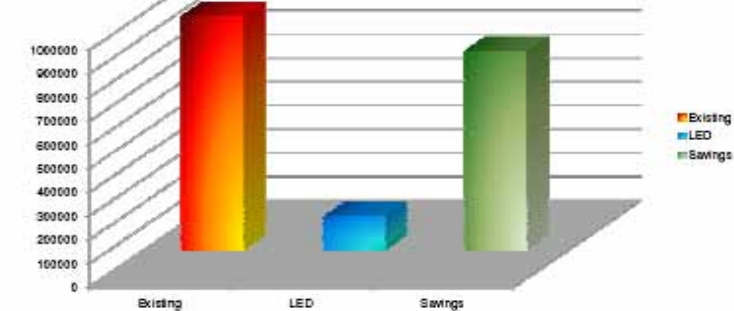

The total installed cost of the LED lighting solution including the sophisticated control system was £148,824 which was fully funded by an interest-free loan from the Carbon Trust. The monthly loan repayments that G24i are now making are outstripped by their monthly energy savings. The estimated payback period for the project is just 18 months, after which the new system will have been fully paid. The life of the lights is up to 50,000 hours after which time the client will have made savings in the region of £850,000 as the lights are run on a 24/7 basis.

Project Savings

G24i Case Study:

Investment: £148,000.... Payback: 1.5 yrs.... annual savings: £93,000

Wales & West Housing Association

WWHA provide homes and services to more than 25,000 people. they work in 16 local authorities and manage over 9,000 properties. They have over 300 staff committed to providing good quality service to all their residents

The first 2 projects were 'Bronrhiw Fach' (Caerphilly) and Bridge man Court (Penarth). The projects focused improving the lighting and reducing the energy costs on corridors and stairwell lighting where some lighting is on 24/7. Bronrhiw Fach achieved pay-back in 1.5 years and by adding occupancy control reduced electricity costs by over 90%

TRAFFEX 2009– a successful exhibition

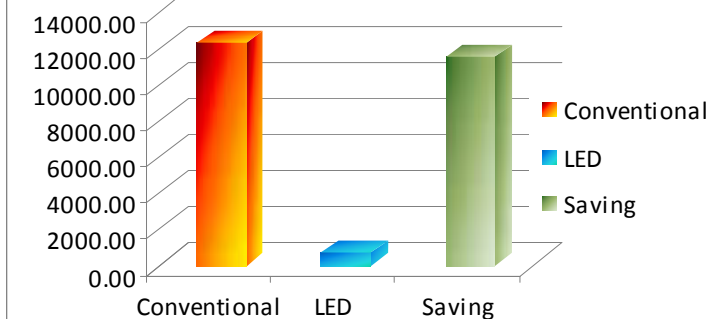

Traffex is the international meeting place for anyone involved in the design, management and maintenance of today's traffic and highway infrastructure. I-vision exhibited at this years show and presented a wide range of street/car park lighting and a mixture of architectural lighting. The show was a great success and with a keen interest being shown in the Latest LED technology, I-vision has already secured projects with a mixture of clients. I-vision would like to offer a big thank you to everyone that came to visit them at the show.

i-vision have partnered with Candela Lighting to produce 3 new LED street lighting module based on the popular 'LINA', 'NEOS' and 'ASTON' units manufactured by Candela. The units will be available in 30/40 and 70 Watt LED versions

Investment: £2,200Payback: 1.5 yrs.... annual savings:£1,490
